

i would like to urge you to reject the NBA's petition 04-160 and support XM's ability to provide the kind of programming that I desire. I enjoy listening to my radio where ever I am throughout the USA with out having to search for other stations and with out a bunch of useless (to me) advertizements. XM gives me the kind of service, music, weather, traffic, news and other topics that i like to listen to. i pay for this service and would not want to be denied the stuff i have come accustomed to listening to. I do not want NAB to be able to dictate what I can and cannot hear on my XM radio. Thanks for your ear - now do the right thing.
